Brief History

How We Started

We are a company engaged in import-export trading, property, and investment manager. Starting from concern for the lower class people who sell commodities, but at low prices, we are moved to help them sell overseas. At this time, we are also still focusing on export and import. In the future, we will focus on directing investment funds to property because Indonesia has a high prospect in the property sector, supported by the increasing number of Indonesian population every year.
