

PT Exellent Karya Indonesia

# COMPANY PROFILE

We provide the best agricultural products from Indonesia

2022

# ABOUT US

**PT Exellent Karya Indonesia** was legally established in January 2022. Prior to its legal establishment, this company started in July 2021 with the Exellenttea brand for tea and herbal tea trading businesses. We have successfully partnered with **ten tea estates** with a total land area of **7500 hectares** and a production capacity of **50 tons/day**. Over time, we often get requests for spices and herbs to be exported abroad. Therefore, we are adding to our product collection with spices and herbs from Indonesia by collaborating with **seven factories** that have plantations or have a network of spices and herbs farming in Indonesia. While searching for commodity producing partners, we also found several partners with commodities other than our main commodities of tea and spices. As a result, we also have an additional collection of products that we can export such as coconut sugar, coffee, organic fruit, etc.

With the existence of PT. Exellent Karya Indonesia, we act as a **solution** to connect commodity **producers** with a wider domestic & international market. That way, we can help improve the welfare of workers in the commodity industry and we can help the Indonesian commodity industry to develop for the better. In addition, we can help **buyers** to get the products they need with the right quality and price so that buyers will be satisfied and comfortable buying products from Indonesia.

# Our Commitment

## Vision

Become a global leader in supplying the best agricultural products from Indonesia.

## Mision

- Consistently making improvements, to be better at meeting customer needs and satisfying customers.
- Improve the welfare of farmers and workers in the agricultural industry.
- Encouraging the production of environmentally friendly and sustainable products.

Origin

**Proudly our products** come from the territory of Indonesia and spread in various regions. The origin of our products is far from urban areas with a well-maintained environment.

Ingredients

**The ingredients** we use are of course the best and have gone through various sorting and quality assessments. So that the final product produced must have the best quality.

Manufacture

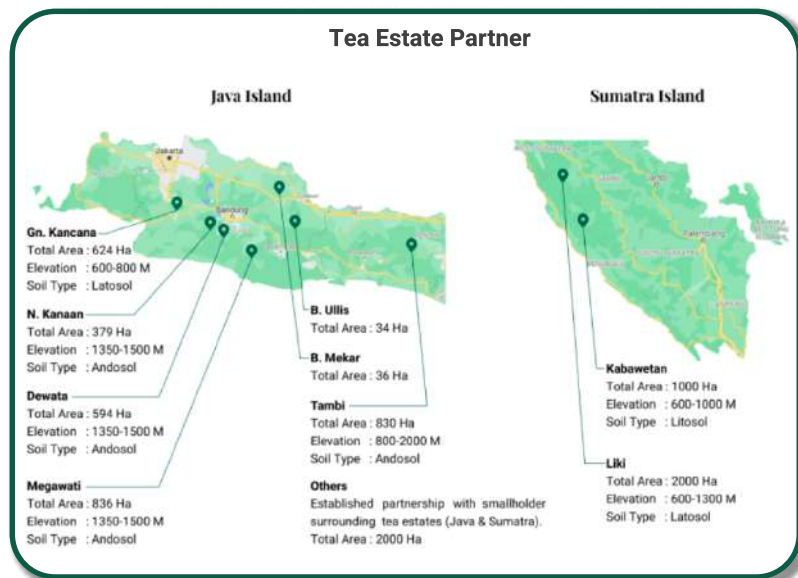

**Our product manufacturing** process has a focus on cleanliness and the process can be traced every process. The seriousness of our manufacturing is seen by the international certification standards that we have met.
