To be the leading and sustainable palm oil company by producing quality products that benefits the communities.

MISSION

Giving Quality and service that a better in about raw in materials and ability. Creating a local human resources prosperous , powerful and independent.
To fulfill customer's demands.
To maximize profits for stakeholders.

PRODUCT

Crude Palm Oil is an edible oil that is extracted from the pulp of oil palm fruits and it is an important vegetable oil that is used as the raw material for both food and non-food industries.

Cooking Oil is a fully refined vegetable oil made from selected quality palm oil that is rich in Vitamin A and E which is also non cholesterol. Strict quality control measures are imposed for the production and processing of Cooking Oil. Such State of the art technology and methods were being implemented by the professionals in the edible oil industry.

RBD Palm Kernel Oil is used as a good source of liquid oil for margarine and shortening and is also used for soap and detergent manufacturing due to its high content of C12.

RBD Palm Stearin is an essential raw materials used by shortening and margarine industries, as a source for producing specialty fats for coating in confectionery and also used in the manufacturing of oleochemicals.

Palm Kernel Expeller is obtained from the palm kernel after the oil has been extracted and is mainly used in animal feed industries. It is also high in energy and fiber and retains a good level of residual oil.

Palm Kernel Shell can be used as an alternative fuel for biomass-based combined heat & power plants to produce heat & power for Industrial Boilers, Power Plant, Residential & Commercial Heating Furnace & foundries, Etc.
