Vision

1. Providing services to customers with the best quality & customer-oriented trust and cost-effective.
2. Provide benefits and great benefits to customers in all sector.

Teak Wood

Teak Wood is a kind of high-quality wood production. Teak wood is classified as wood with a durable class. Has a strong resistance to mold, rot due to moist air or insect attacks. Teak wood also has good resistance to weather and temperature changes.

With special characteristics of teak wood, the oil content in teak makes the strength of teak better than other types of wood.

Teak wood with beautiful color and texture smoothness makes teak wood a luxurious type of wood.

The fiber character and color have their own characteristics. Therefore, the price of teak is more expensive.
