ROTARY PRINTING

Fabric Business

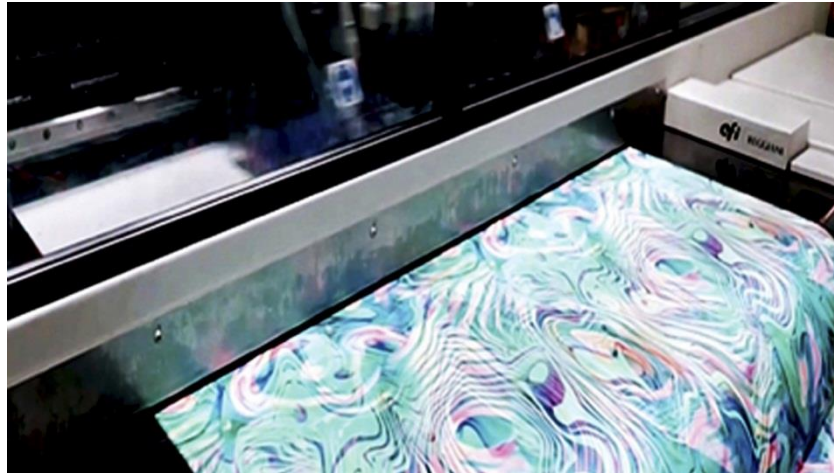

Modern finishing unit resulting a premium print and dyed fabrics using natural and cellulosic fibre. Our finishing unit has a capacity up to 30,000,000 meters of fabrics per annum.

We supply eco-friendly finished fabrics for fashion, uniform, craft and home-décor for major brands and retailers worldwide.

To ensure the quality of our rotary printing, we are constantly investing in the latest technology.

DIGITAL PRINTING

Digital Print enable us to provide a smaller quantity per design, giving us the flexibility for custom request.

The advantage of Digital is being able to produce a more sophisticated design as compared to conventional Rotary.

DYEING

Our dyeing facility caters to various customers for both local and international market.

We are entirely committed to help your business succeed by offering top-notch quality dyeing combined with quick turnaround time.
